

OTIS Lab Expands its Horizon: Forays into Infrastructure and Engineering (Ohcs Projects (I) Pvt. Ltd.)

Operating in B2B business segments has always been the company's focus and strength. With strong business fundamentals in place, we are confident that the year 2014-15 will be a year of continued growth and progress which is followed by last year's success story. The company has branched out into the infrastructure and engineering domain along with its traditional business of testing.

Establishments

Offshore Testing & Inspection Services (I) Pvt. Ltd. (OTIS), an NABL Accredited Testing and Calibration laboratory is known for prompt, economical and reliable testing, inspection and calibration services since 1994 to Onshore and Offshore segments covering – Mechanical, Chemical, Corrosion, Non-Destructive Testing and Mechanical, Thermal and Electro-technical Calibrations.

The company was set up in 1994 and has since adhered to its motto as achieving continually better levels of customer satisfaction.

Ohcs Projects (I) Pvt. Ltd., a dynamic young company has made its foray into Infrastructure and Engineering and envisions being India's largest infrastructure company. This initiative billets a futuristic approach towards the impending rise of youth involvement in these industries. Our youthful approach will ascertain bright and exciting ideas induced within these age old industries, maintaining focus on quality execution. It is our dream to build

world class splendors through an exuberant family of skilled workers.

Infrastructure businesses are the breadwinners of the basic, often vital, facilities, amenities and technology which gives way to the progress and growth of a modern community. Infrastructure companies spawn sustainable cash flows owing to inelastic customer demand for services.

Shaleen V. Vaid, MD, OTIS (I) Pvt. Ltd and Ohcs Projects (I) Pvt. Ltd. employs over 15 years of experience as a director with Offshore Hook-up & Constructions Services (I) Pvt. Ltd. and carries an aptitude of fine business skills which he brings to the table at the company. Vaid, an engineer, possesses utmost proficiency in building and scaling companies. OTIS and Ohcs Projects under his guidance form the foundation of his companies which are robust and resilient.

From MD's Desk

"A successful society is characterized by a rising living standard for its population, increasing investment in factories and basic infrastructure, and the generation of additional surplus, which is invested in generating new discoveries in science and technology."

I firmly believe in the above quote and I believe that advanced technology is the answer to build a fascinating future of the country. And to build this future, I have built a workforce of qualified, experienced, certified and reliable individuals with expertise in inspection and testing as well as

leveraged young talent for infrastructure and engineering. I can confidently say that our company is well equipped to handle nearly any reliability program requirement no matter the complexity or location.

Indian industry is passing through challenging and exciting times. New products are replacing traditional ones. Multinational companies are setting up base, while small local entrepreneurs are challenging established players. Within the last decade, there has been a transformation in how business is done in India. Many companies that have failed to change have suffered, as products have disappeared from shop shelves, giving way to the demands of new lifestyles. Companies must adapt to overcome the challenges over the years.

We are focused on providing our customers valuable information and solutions which, in turn, enables them to make cost effective decisions. The company values are non-compromising under any circumstances and we strive hard to uplift the core values. We invest time in understanding and investing in our client needs to deliver excellent, unwavering and safe services. Our values which we tread on encourage innovation at all levels.

We have worked with several clients who are world leaders and our sincere work reflects in their projects.
